We are dedicated to the belief that Centre Concrete Company employees rank among the best and most productive in the ready mix concrete production industry. Health and personal safety at work and home is a paramount concern and priority of Centre Concrete. Therefore, our goal for managing safety at Centre Concrete Company is to achieve ZERO injuries.

We Believe

- ❖ All serious injuries and incidents are preventable
- ❖ We have a moral responsibility to provide a safe work environment
- ❖ Safety, Productivity, Quality and Profitability are equally important
- ❖ All hazards can be safeguarded
- ❖ All employee's are responsible for their own safety, the safety of others, and the safety of the organization

These beliefs are the cornerstone from which all safety principles and policies will be built. This philosophy and each employee's personal commitment provide the necessary framework for achieving safety excellence.

We will work to create safety as a lifestyle. We will strive to have our employee's make it a part of each workday and urge that it be carried into their lives away from work.

-Eric C. Nicholson

President
